

I understand there is a petition in the works (04-160) to limit the ability of XM Radio to broadcast traffic and weather via satellite. Do the Bill of Rights apply anywhere anymore? This is nothing but an attack on free speech; the FCC and the airwaves are not for sale (theoretically), and as long as the material broadcast over the airwaves is for the public good, there should be NO boundaries placed on content.

DO THE RIGHT THING... FREE SPEECH WITHOUT LIMITS ON CONTENT IS A RIGHT, NOT A PRIVILEGE!!
